

The Iris table lamp transforms its form and the atmosphere in a room by changing its light direction and projections. By adjusting this lamp you can have a strong up light that lights the room or a down light made of light reflections around the lamp, or mixture of both. The reflective interior of the this table lamp casts intricately patterned reflections that change as the lamp's configuration is changed.

The Iris Lamp is the fruit of years of development of the patented overlapping leaves mechanism, first explored in lighttexture's Steamlight series. (Patent #8,025,430) Composed of overlapping stainless steel leaves, each Iris Lamp has two adjustable apertures; as one opens, the other closes. The transition between these two provides a variety of reflections and light atmospheres.

Stainless Steel

**Lamp Base:** G4

**Wattage:** 6W

**Supplied bulb:** 6W LED Bulb

**Control:** Touch dimmer switch on lamp base

**Warranty:** 1 year

**Country of Manufacture:** USA

**Weight:** 3 lb.

**Listing:** All of the electrical parts are UL listed

**Base and Shade Material:** Brass or stainless steel

**Finish:** Brushed and polished brass or stainless steel
